4 DECISION ON ADMINISTRATIVE APPEAL

5 RE: PUBLIC WORKS CASE NO. 93-054

6 TUSTIN FIRE STATION (TUSTIN RANCH)  
7

---

8 I.

9 INTRODUCTION AND PROCEDURAL HISTORY

10 In 1986, The Irvine Company ("TIC") and the City of Tustin  
11 entered into a lengthy and complex agreement regarding  
12 commercial and residential development of 2,000 acres of land  
13 owned by TIC within the City of Tustin. As one aspect of this  
14 agreement, the parties agreed that TIC would set aside  
15 approximately one acre within the larger area (known as the  
16 "Tustin Ranch") on which to build a fire station; this would be  
17 conveyed to the City upon completion. TIC and the City also  
18 agreed that the City would reimburse TIC for the costs of  
19 construction of the station. The agreement left to future  
20 negotiations selection of the means by which the reimbursement  
21 was to be accomplished. During the next few years, the City and  
22 TIC entered into several supplemental agreements.

23 In October 1993, shortly before construction of the fire  
24 station was to begin, a complaint was filed by the Los Angeles  
25 and Orange County Building and Construction Trades Council,  
26 asking the Department of Industrial Relations ("Department") to  
27 apply the prevailing wage laws to construction of the fire  
28 station. On November 3, 1993, TIC requested a coverage

1 determination from the Director, of Industrial Relations, arguing  
2 that the fire station construction should not be viewed as a  
3 public work within the meaning of Labor Code Section 1720 et.  
4 seq.

5 On April 15, 1994, the Director issued a public works  
6 coverage determination finding that the fire station  
7 construction is a public works project within the meaning of  
8 Section 1720. Timely appeals from this determination were then  
9 filed by TIC, by general contractor R.D. Olson Construction, and  
10 by Raetec Engineering Inc. a sub-contractor on the project.  
11 Counsel for TIC requested a hearing before the Director.

12 For the reasons set forth below, the request for hearing is  
13 denied and the initial public works coverage determination is  
14 affirmed.

## 15 II.

### 16 ISSUES TO BE DECIDED

#### 17 Contentions on Appeal

18 A. The payments made by the City of Tustin to reimburse  
19 TIC for costs of the fire station construction are not "public  
20 funds" within the meaning of Labor Code Section 1720 because of  
21 the source and nature of the funds.

22 B. The circumstances here are essentially the same as  
23 those in other public works coverage cases in which developers  
24 made the initial payments for construction of a building later  
25 conveyed to a public entity, and in which the Director  
26 determined that the projects were not public works.

27 C. Because the construction project proceeded on the  
28 assumption that payment of prevailing wages was not required and

1 is now completed, prevailing wage requirements should not be  
2 applied in this case.

3 Conclusions on Appeal

4 A. The payments made by the City of Tustin, reimbursing  
5 TIC for the cost of the fire station construction, are "public  
6 funds" within the meaning of Labor Code Section 1720. The  
7 method by which the City collected the money designated for the  
8 fire station does not require a different conclusion.

9 B. The coverage determination here is consistent with past  
10 coverage determinations.

11 C. Estoppel and "fairness" considerations related to the  
12 timing of the issuance of the coverage determination do not  
13 require reversal of the initial determination.

14 III.

15 FACTS

16 The "East Tustin Development Agreement" between the City of  
17 Tustin and TIC, adopted November 3, 1986, includes the following  
18 provisions:

19 1.10 Fire Protection Facility The City has  
20 determined the need for an additional fire  
21 protection facility to serve the East Tustin area  
22 .... Developer shall make available to City  
23 without cost to City a parcel of land (not to  
24 exceed one acre in area) adequate to support a  
25 facility of 8,000 square feet. Developer shall  
26 provide for the construction of that facility per  
27 City standards and the acquisition of a new engine  
28 pumper for that facility at total costs not to  
exceed \$1.3 million in 1986 dollars, excluding  
land. Acquisition of the land and engine-pumper  
and construction of the fire facility may be  
financed through the formation of a Mello-Roos  
district or other similar assessment or special  
tax district, or through fee programs as may be  
adopted by the City, payable upon issuance of  
building permits, to finance such acquisition and  
construction ...

1 On March 7, 1988, the Tustin City Council adopted  
2 Resolution No. 88-12, imposing a building fee on each parcel  
3 within the over-all East Tustin area, which is the subject of  
4 the 1986 agreement. The resolution included the following:

5 I. The City Council finds and determines as follows:

6 A. The Development Agreement authorizes the  
7 establishment of a fee program to finance the  
8 following TIC obligations to fund improvements  
that will serve the East Tustin Specific Plan  
Area:

9 1. Fire protection facility and new engine  
10 pumper at a cost of \$1.3 million, in 1986 dollars  
...

11 B. The City, in conjunction with TIC, has  
12 considered methods available to finance the  
13 foregoing TIC obligations and has determined that  
14 the most equitable means of funding would be  
through a program of fees, payable upon issuance  
of building permits.

15 II. All private development within the East  
16 Tustin Specific Plan area shall be required to pay  
17 fees, prior to the issuance of building permits,  
18 to fund a fire-protection facility and engine  
pumper .... The method used of calculating how  
much a specific project must pay in fees shall be  
shown in Exhibits A, B and C attached hereto ...

19 Attached to the resolution are a series of tables,  
20 identifying various "tracts," "sectors" and "lots" within the  
21 over-all area, and assigning to each a specific cost for the  
22 "fire protection facility and equipment." The total of the costs  
23 assigned to the tracts, sectors and lots is \$1,300,000. The  
24 costs are tied directly to the acreage of each tract, sector or  
25 lot; the cost for each property is a proportionate percentage of  
26 \$1.3 million.

27 On September 10, 1990, the City and TIC entered into a  
28 "Reimbursement Agreement for Dedication and Construction of a

1 Fire Protection Facility and Purchase of a New Engine Pumper."

2 On September 15, 1993, the City and TIC entered into a "First

3 Amendment to Reimbursement Agreement for Dedication and

4 Construction of a Fire Protection Facility and Purchase of a New

5 Engine Pumper." This last agreement included the following

6 provision:

7       Section 2 ...

8  
9       b. City shall reimburse and pay to Company the  
10 full amount of City Fees collected by the City  
11 for costs incurred by Company in the design and  
12 construction of the Project in accordance with  
13 the terms of this Agreement. The City shall not  
14 have any obligation to reimburse the Company for  
any costs incurred for design and construction  
of the Project, which exceed the total amount of  
City Fees ultimately collected for the Project,  
less the cost of the purchase of the Fire Engine  
and provided herein ...

15       d. Upon completion of the Project, City shall  
16 pay to the Company any and all City Fees  
17 collected by City for the Project which have not  
18 been previously reimbursed by the City to the  
19 Company for the costs of design and construction  
20 of the Project pursuant to Section 2a above and  
which have not been expended by City in the  
purchase of the Fire Engine pursuant to Section  
4 below. In addition, City shall subsequently  
pay to the Company any City Fees collected for  
the Project after completion of the Project ...

21       The 1986 Development Agreement permitted TIC to enter into  
22 agreements with other businesses to carry out the development  
23 contemplated by the agreement. By the time the Director issued  
24 the coverage determination from which this appeal was taken, TIC  
25 had entered into such arrangements with other business entities.  
26 The City had collected fees of \$800,000 from TIC and from these  
27 other developers. The City had reimbursed TIC in the amount of

28 ///

1 approximately \$100,000 pursuant to their agreement on the  
2 subject.

3 The construction contract between TIC and the general  
4 contractor was agreed to on October 18, 1993. It identified a  
5 series of sub-contractors. The Notice to Proceed from the City of  
6 Tustin to the contractor was dated the same day. As noted above,  
7 the initial request by TIC for a coverage determination was  
8 included in a letter dated November 3, 1993, 16 days later. That  
9 letter noted that the ground preparation for the project had begun,  
10 although actual construction had not yet begun.

11 There is no indication in any of the information presented to  
12 the Department that the City of Tustin or any other public agency  
13 advised TIC or its contractors that the project was exempt from the  
14 prevailing wage laws.

15 At various times between mid-November 1993 and early February  
16 1994 there was correspondence to counsel for TIC and to the City of  
17 Tustin, and telephone requests for information by the Department.

18 Since issuance of the determination letter on April 15, we  
19 have been advised by the general contractor that construction of  
20 the fire station was completed April 28.<sup>1</sup>

#### 21 IV.

#### 22 DISCUSSION

##### 23 A. No hearing is required.

24 8 CCR section 16002.5(b) states that: "The decision to hold  
25 a hearing is within the Director's sole discretion." In the  
26 interest of conserving the resources of both the Department and  
27

28 <sup>1</sup>We have not been advised as to whether a notice of completion has been filed with the county recorder, or whether the city has accepted the fire station. See Labor Code section 1775.

1 the interested parties, hearings are generally not held in  
2 appeals of public works coverage determinations unless one is  
3 necessary to resolve substantial disputes as to material facts.  
4 The facts recited above are not in dispute, nor has any party  
5 asserted that any of these facts has changed since the initial  
6 coverage determination issued. The appellants do not challenge  
7 the determination's finding of facts, but rather the way the law  
8 was applied to the undisputed facts. Since the issues to be  
9 decided are essentially legal issues, no hearing is necessary,  
10 and the appeal is decided herein on the basis of the evidence  
11 previously submitted.

12 B. The fire station was paid for in part with the use of  
13 "public funds" within the meaning of Labor Code section 1720 et.  
14 seq.

15 It is undisputed that: (1) the City of Tustin is obligated  
16 to make payments to TIC to reimburse TIC for the cost of  
17 constructing the fire station; (2) the City has made such  
18 payments; and, (3) the source of these payments is money  
19 collected by the City in the form of building fees imposed by  
20 the City upon the developers within the "East Tustin Specific  
21 Plan" area. On appeal, TIC and R.D. Olson Construction contend  
22 that, because the sole source of these payments by the City is  
23 building fees imposed by the City on developers who undertake  
24 projects within the East Tustin area, these funds cannot be  
25 considered "public funds" within the meaning of Labor Code  
26 section 1720.

27 ///

28 ///

1 TIC argues that the building fees were adopted by the City  
2 under its "police" power rather than under the City's taxation  
3 powers. It also argues that the City had no discretion how to  
4 use these funds because it was obligated, by its agreements with  
5 TIC, and by the terms of its 1988 resolution, to spend all money  
6 collected to reimburse TIC for the fire station construction  
7 costs. From these circumstances, TIC argues, the money raised  
8 cannot be viewed as "public funds" within the meaning of Labor  
9 Code section 1720. This argument is rejected for the following  
10 reasons:

11 Neither Labor Code section 1720 nor any related statutory  
12 provision includes a definition of "public funds." The  
13 Department's regulations (8 California Code of Regulations  
14 section 16000) include the following definition of "public  
15 funds":

16 "Includes state, local and/or federal monies." The  
17 regulation makes no distinction between money raised by a  
18 government by means of taxes and money received by a government  
19 entity or agency by any other means.

20 Prior public works coverage determinations of this  
21 Department have found government expenditures to be public funds  
22 without regard to whether the money spent was acquired by the  
23 government entities through their power of taxation or by some  
24 other means. Among the examples are the following:

25 In Calexico Airport Hangar (PWCD #92-034, Jan. 25, 1993),  
26 it was held that construction paid for by funds collected by the

27 ///

28 ///

1 City of Calexico as insurance policy proceeds to pay for the  
2 replacement of buildings that were damaged by fire, was within  
3 the definition of a public work.

4 In Fallen Leaf Community Services District (PWCD #93-009,  
5 June 30, 1993), it was held that the construction of a storage  
6 structure by the District, using funds donated by a private  
7 party or parties, was a "public work." The coverage letter  
8 includes the following statement:

9 "While the funds are originally private in nature,  
10 they are placed in the public coffers under the  
11 direct control and disposal of the district,  
12 making them public funds."

13 In Shasta Gateway Industrial Park (PWCD #92-022, September  
14 16, 1992), California prevailing wage laws were found to be  
15 applicable when a local district undertook a public works  
16 project which was ultimately to be paid for by one or more  
17 federal agencies. The fact that the money was not raised by a  
18 state or local tax of any kind did not exempt the project from  
19 the state's prevailing wage requirements.

20 Thus, when money collected for, or in the coffers of, a  
21 public entity is spent on a project that falls within the  
22 definition of a "public work," prevailing wage obligations  
23 attach.

24 Although no reported appellate decision has ruled on the  
25 specific question presented here, McIntosh v. Aubry (Pracor  
26 Inc.), 14 Cal.App.4th 1576, 18 Cal.Rptr.2d 680 (1993)  
27 acknowledges that one way to recognize "public funds" is to  
28 determine whether the money spent comes out of public coffers.  
29 McIntosh held that a County's forbearance from both collection

1 of land rent and collection of payments normally made to the  
2 County by builders during the construction process does not  
3 amount to payment of public funds:

4 We hold that the cost waivers were not public  
5 funds paid for construction .... Like the  
6 forbearance of rent, these "costs" involve no  
7 payment of funds out of county coffers. (Emphasis  
8 added) (Id. at page 1590)

9 With respect to the forbearance of rent, the court  
10 noted:

11 The word "funds" is not specially defined in the  
12 statute but has a well-established meaning in  
13 common parlance .... The dictionary defines it as  
14 "available pecuniary resources ordinarily  
15 including cash and negotiable paper ...."  
16 [internal quotation marks and citation omitted]  
17 (Id. at p. 1588).

18 The TIC appeal letter cites several California decisions  
19 comparing taxes and fees assessed by cities. None of the  
20 decisions touches on the central issue in this case, or carries  
21 any significant implications for the decision required here.  
22 Trent Meredith Inc. v. City of Oxnard, 114 Cal.App.3d 317, 170  
23 Cal.Rptr. 685 (1981) decided whether a city ordinance requiring  
24 a property developer either to pay fees or dedicate land to a  
25 local school district was not an ad valorem tax, and therefore  
26 was not subject to the limitations in Article 13A of the  
27 California Constitution. The decision says nothing about the  
28 implications of the fee/tax dichotomy for other purposes,  
including public works. In Furey v. City of Sacramento, 780  
F.2d 1448 (9th Cir. 1986), the Court of Appeals considered  
whether a county's construction of a sewage system, issuance of  
bonds, and assessments of costs upon the property owners within  
the district should be viewed as a "taking" within the meaning

1 of Article XIV of the Constitution. In analyzing whether the  
2 construction of an improvement from which the landowner derives  
3 no benefit amounts to a "taking," the court recognized that some  
4 such undertakings have been compelled by the government, while  
5 others are private investments voluntarily undertaken, with the  
6 assistance of the government. The Court ultimately decided that  
7 construction of the sewage system in the particular case was not  
8 a taking. The decision, however, carries no implications for  
9 whether the money raised by means of development fees is  
10 properly viewed as "public funds" when spent for construction of  
11 a building intended for use by a public entity.

12 C. The reimbursement provisions in the agreements bring  
13 this project within the meaning of a "public work" and  
14 distinguish it from others cited by TIC in its appeal.

15 A recent coverage determination held that where a city  
16 redevelopment agency agrees to reimburse a developer for the  
17 costs of grading work and off-site improvements needed for a  
18 planned shopping mall, the improvement projects are "public  
19 works" within the meaning of Labor Code section 1720 and  
20 prevailing wage laws apply.<sup>2</sup>

21 In other prior determination letters, it has been held that  
22 the character of the funds used to pay for a project is  
23 dependent on the identity of the entity that bears the ultimate  
24 burden of paying for the project. When a public agency lends  
25 public money to a private entity, and the private entity agrees

26 <sup>2</sup> Wal Mart Shopping Center, Lake Elsinore (PWCD # 93-012, March 28, 1994). Similarly, in Redevelopment  
27 Agency of the City of Torrance (PWCD #93-023, October 4, 1993), it was decided that a public agency's  
28 reimbursement of the construction costs of a private entity for street, sewer line and water line improvements brought  
that work within the definition of "public work" within the meaning of Labor Code Section 1720. Payment of  
prevailing wages was not required in that case because the city is a charter city, which had chosen to exempt itself  
from the operation of the state's prevailing wage laws.

1 to repay the loan, the money loses its identity as public funds,  
2 inasmuch as it is the lender, rather than the public entity,  
3 that ultimately bears the cost of the construction project.<sup>3</sup>

4 TIC's appeal letter cites three previous public works  
5 coverage determinations, but relies primarily on Rancho Santa  
6 Margarita Company (May 12, 1986).<sup>4</sup> In that determination, the  
7 issue that was decided was whether the developer of a  
8 subdivision, who had agreed to construct a fire station and  
9 library for dedication to the county, could properly be viewed  
10 as an agent of the county. The Director in that case determined  
11 that the arrangement did not "constitute the appointment of the  
12 developer as the county's agent or construction manager." In  
13 contrast, the coverage determination letter issued in the  
14 present case did not consider whether the City of Tustin and TIC  
15 had an agency relationship. The coverage determination issued  
16 here turned on the evidence that the City had agreed to  
17 reimburse TIC for the fire station construction, and had taken  
18 steps to carry out that promise. This decision on appeal,  
19 likewise, is based on the reimbursement agreement and not on any  
20 agency theory.

21 In its appeal, TIC argues that the circumstances in the  
22 Rancho Santa Margarita case are exactly parallel to the  
23 circumstances in the present case. On the contrary, the  
24 parallel breaks down at the crucial point. At the time of the

25  
26 <sup>3</sup> See, e.g., Iceflow Athletic Complex, Co-generation Plant (PWCD #94-006, March 17, 1994); Avenida España Gardens Project (PWCD #93-051, March 25, 1994) and the cases cited in each of those.

27 <sup>4</sup> The two other determination letters cited by TIC are City of Atascadero Fire Station No. 2 (July 31, 1987) and IDM Corporation Offsite Improvements Dedication (July 10, 1987). However, as the initial determination letter in this  
28 case noted, there was no indication or suggestion in either of those instances that the public agency had agreed to any obligation to repay the contractor that was bearing the initial cost. For that reason, those determination letters do not provide useful precedent here. In its appeal letter, TIC does not dispute our analysis of those two decisions.

1 decision in Rancho Santa Margarita, the County had made no  
2 promise to the developer that the County would reimburse the  
3 developer for the costs of construction of the two buildings.  
4 In this case, the City and TIC reached an agreement in 1986 that  
5 the City would reimburse the company for the costs of  
6 construction, with the specific method of raising the funds for  
7 reimbursement left unspecified. Thus, it is not correct, as TIC  
8 asserts in its appeal letter, that the factual circumstances in  
9 the two instances are parallel. It is not correct that  
10 construction of the fire station was done "at no cost" to the  
11 City of Tustin.

12 TIC states in its appeal letter that in Rancho Santa  
13 Margarita, "the County acknowledged that it might assist Rancho  
14 Santa Margarita in fulfilling its obligation for the fire  
15 station as a funding conduit through, in that instance, a  
16 possible Mello-Roos District." [emphasis added]. However,  
17 there is no indication in the Rancho Santa Margarita  
18 determination letter that the County had in fact formed a Mello-  
19 Roos district, or had promised to form a Mello-Roos district, or  
20 had agreed that once such a district were to be formed, the  
21 developer's construction costs would be reimbursed by funds  
22 raised by the district. The only comment in the letter  
23 regarding a Mello-Roos district is the following:

24  
25 Since the element of a publicly awarded  
26 construction contract is missing, the question of  
27 the significance of the potential reimbursement  
out of public funds by creation of a Mello-Roos  
Community Facilities District becomes moot.  
[emphasis added].

28 ///

1        Thus, the Rancho Santa Margarita coverage determination  
2 letter specifically reserved decision concerning the  
3 significance of repayment to the contractor by the county, if  
4 repayment was later arranged. Inasmuch as the decision did not  
5 consider the significance of potential repayment of the  
6 construction cost by the public agency, it cannot be taken as  
7 precedent on the issue to be decided here.

8        D. Applicability of the ruling in the present case.

9        All three appellants urge the Department not to apply the  
10 prevailing wage laws in the present case because the project has  
11 been completed. Appellant R.D. Olson Construction argues that by  
12 not issuing the initial coverage determination until April 15, the  
13 Director "waived your right to declare this project a public work  
14 of improvement, and that by doing so at this later time, you have  
15 abused your discretion in creating an inequitable and  
16 unconscionable result."

17        The factual circumstances here do not warrant a Department  
18 decision to refrain from applying the prevailing wage laws. As  
19 noted above, TIC and the general contractor entered into the  
20 construction agreement on October 18, 1993. The first request for  
21 a coverage determination was made by TIC on November 3, 1993, 16  
22 days later. Thus, neither the City of Tustin, TIC, the general  
23 contractor nor any sub-contractor sought a prevailing wage coverage  
24 determination from this Department prior to negotiation of the  
25 contract, the signing of the construction contract, or commencement  
26 of the work.

27        Second, TIC was aware that the project would be paid for by  
28 public funds, through the reimbursement mechanism. All parties

1 were aware that the project was a fire station intended for use by  
2 the City of Tustin, a public entity. The City Council resolution  
3 describing the reimbursement arrangement was sufficient to put all  
4 parties on notice of the public funding. No party has suggested it  
5 was advised, prior to negotiation of the contract or commencement  
6 of the work, that the prevailing wage laws would not apply to the  
7 project.

8 Third, the correspondence and telephone requests for  
9 information between this Department and TIC and the City during the  
10 period between November 1993 and February 1994 were a clear  
11 indication that the applicability of the prevailing wage laws was  
12 under active consideration by the Department.

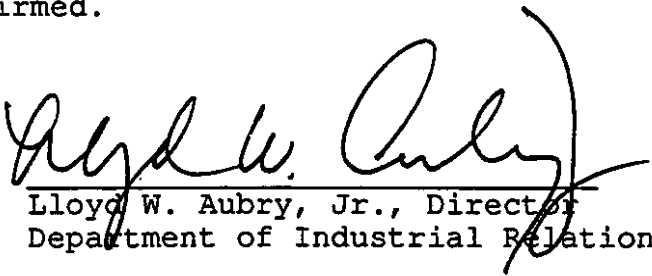

13 As noted, the coverage determination letter was issued 13 days  
14 prior to completion of the project.<sup>5</sup>

15 Given the circumstances described above, it is determined that  
16 there is no reason to refrain from applying the prevailing wage  
17 laws to the project at issue here.

#### 18 CONCLUSION

19 For the foregoing reasons, the appeals by The Irvine  
20 Company, R.D. Olson Construction, and Raetec Engineering Inc. of  
21 the Department's public works coverage determination are denied,  
22 and that determination is affirmed.

23  
24 Date: 6/28/94

  
Lloyd W. Aubry, Jr., Director  
Department of Industrial Relations

27 <sup>5</sup> Labor Code section 1775 permits the Director to enforce the prevailing wage laws even after completion of a  
28 project. In Lusardi Construction Company v. Aubry, 1 Cal.4th 976, 4 Cal.Rptr.2d 837 (1992) and in Waters v.  
Division of Labor Standards Enforcement, 192 Cal.App.3d 635, 237 Cal.Rptr. 546 (1987) California courts have  
upheld the retroactive enforcement of the prevailing wage law requirements.
